## MRL Traction Elevator

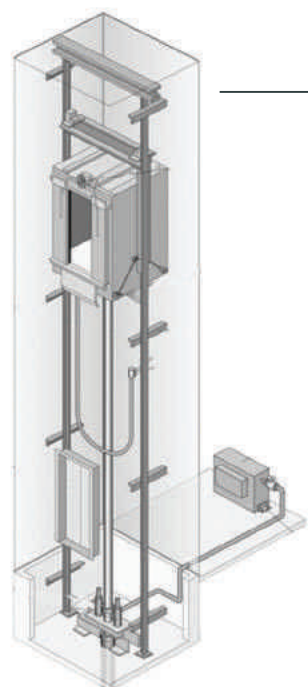

## Hydraulic Elevator

The Hydraulic Home Elevator is an elevating system designed specifically for use in private residence where space is a prime consideration. No machine room, No head room, No side wall, No shaft and No pit - all these aspects made this as popular choice.

ivATOR® are providing brands like **GMV** and **MORIS** which are Italian brands. GMV is an Italian multinational leader in the Hydraulic Elevator industry, having reputation of more than 50 years. They are known for Home Elevator which can operate also in single phase supply.

MORIS ITALIA srl, founded in 1981, produces hydraulic power units and pistons for elevator applications. They are well known for Hydraulic Car Elevator.

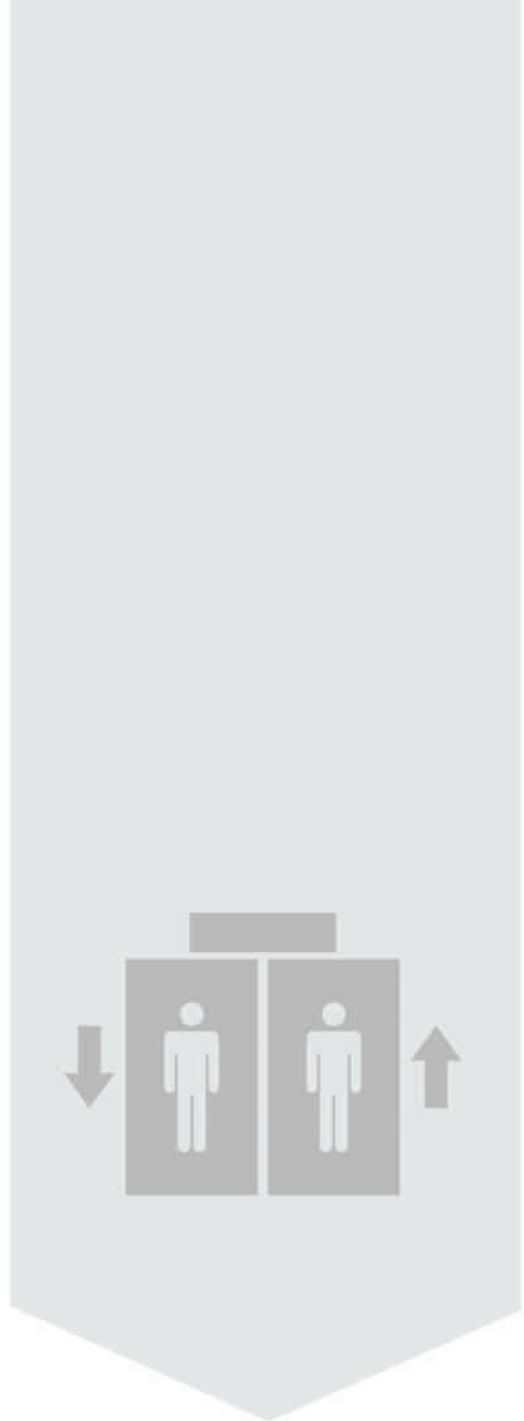

# INDOOR HOME ELEVATOR

We have a solution if you don't have elevator shaft in existing house/ building. With the available space we can build a steel structure even if there is no side walls and machine room. Glasses or sheets of your choice can be used to cover the structure which gives a luxurious look. Whether it is Hydraulic home elevator or traction home elevator both machines can be operated on single phase or three phase supply as well. With optional security features in COP and LOP it can be projected from children. Energy saving mode activation time can be settable in the controller and can make your lift park at your desired floor. Wheelchair access, infrared door sensor and auto rescue device make these home elevator safe and convenient as a commercial passenger elevator .

# OUTDOOR HOME ELEVATOR

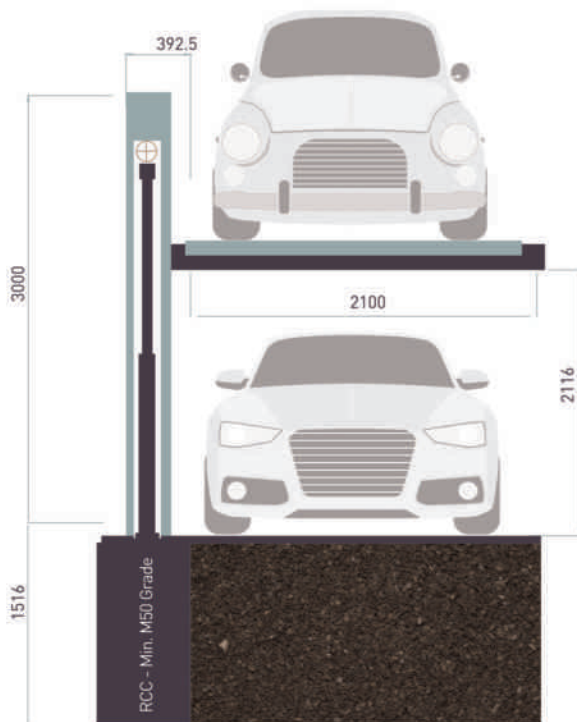

## PASSENGER ELEVATOR

In passenger elevator we are serving all the there types of elevator commonly used traction with a machine room, traction without machine room and hydraulic type. Fabricated with most advanced life controls, appreciated for their high speed, smooth travel and prefect levelling. Different types door such as manual door, Synchronic telescopic door, automatic centre opening door and telescopic doors can be given.

In high density requirements we can provide grouping of multiple elevators to reduce the waiting time of the passengers. Our control panels supports duplex, triplex, quadruplex up to 32 floors with ARD facility. Our proficiency allows us to design and develop passenger elevators of various sizes and capabilities. it gives benefits of jerk less travelling, economically low power consumption and excellent design.

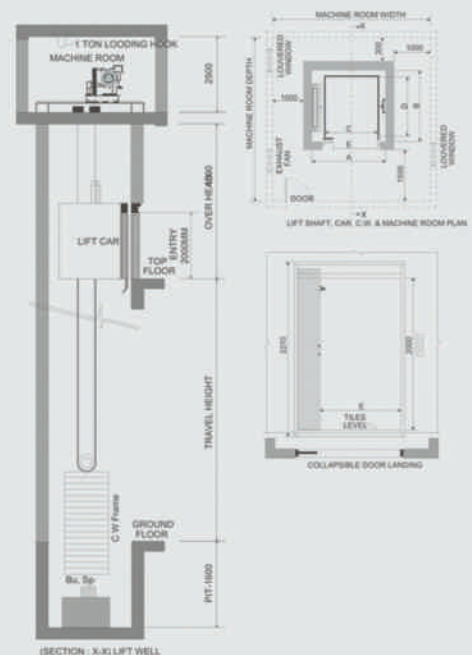

## CANTILEVER CAR PARKING ELEVATOR

Cantilever Stacker	Topmost Level
Platform Sizes (mm)	2300 X 4700
Height Below Platform (mm)	2100
Lifting Capacity (Kg)	2000
Foundation RCC	600 X 600 X 1550 (deep)
Power Pack (HP)	3 HP
